TECHNICAL SKILLS

Cloud & Platforms
- Azure (AKS)
- AWS (EKS)
- VMware
- Nutanix
- OpenStack

DevOps & CI/CD
- Jenkins
- GitLab CI
- GitHub Actions
- CI/CD Architecture
- Pipeline Engineering

Infrastructure as Code
- Terraform
- Ansible
- Chef

Containers & Orchestration
- Docker
- Kubernetes

Monitoring & Observability
- Prometheus
- Grafana
- ELK Stack

Scripting & Automation
- Python
- Shell
- Groovy

Version Control
- Git
- Bitbucket
- GitLab
- Gerrit

Operating Systems
- Linux (RHEL, SUSE, Ubuntu)
- Windows Server

PROFESSIONAL SUMMARY

Principal DevOps Engineer with 15+ years of experience designing and scaling enterprise CI/CD platforms, cloud-native infrastructure, and automation frameworks. Expert in Kubernetes (AKS/EKS), Terraform-based Infrastructure as Code, Jenkins platform engineering, and DevOps architecture modernization.

Proven track record of leading large-scale migrations (on-prem to cloud), CI/CD transformations, and infrastructure automation initiatives. Specialized in building highly available, scalable, and secure platforms with observability (Prometheus, Grafana) and automation at scale. Strong leadership in mentoring teams, driving architectural decisions, and delivering enterprise DevOps solutions.

PROFESSIONAL EXPERIENCE

Principal Software Engineer — DevOps Architect

RSA India Pvt. Ltd. | *Jun 2022 – Present*

- Architected and led enterprise-scale CI/CD platform modernization, including Jenkins LTS upgrade (2.346 → 2.528) with zero/minimal-downtime strategy and rollback design.
- Designed and implemented cloud-native CI infrastructure on Azure AKS using Terraform, improving scalability and reducing infrastructure dependency on VMs.
- Built a CI Monitoring platform using Prometheus and Grafana with alerting systems, improving visibility and reducing incident resolution time.
- Led Jira Server → Jira Cloud migration, including automation, API integrations, and data migration strategy.
- Designed and deployed GitHub Copilot Metrics Viewer platform (Docker-based), enabling engineering leadership to track AI adoption metrics.
- Architecting on-premises Kubernetes cluster for enterprise workloads (ongoing), including networking, security, and HA design.
- Automated infrastructure provisioning using Terraform and configuration management using Ansible across hybrid environments.
- Led migration from VMware to Nutanix infrastructure using IaC, improving deployment consistency and reducing manual effort.
- Mentored engineers and drove DevOps best practices across teams.

Project Leader — DevOps Consultant

L&T Technology Services | *Nov 2016 – May 2022*

Project 1: ISeCL | Client: Intel Corporation

- Responsible for design, management, and optimization of the CI/CD process on GitLab CI; built and deployed project code using Ansible Playbooks.
- Created Ansible Playbooks for OpenStack and Kubernetes setup and deployment automation for ISeCL using GitLab CI.
- Designed monitoring architecture with Grafana & Prometheus; created dashboards for VM monitoring and report generation via Python scripts.

Technologies: Python, Ansible, y ygb**ion**

- Designed cloud infrastructure architecture for AWS and Azure using Terraform with GitLab CI; wrote Ansible and Terraform modules to automate provisioning.

Technologies: AWS, Azure, Terraform, Ansible, AWS EKS

EDUCATION

M.Tech — Computer Science
Visvesvaraya Technological University (VTU)
2023 – 2025 | CGPA: 9.20 / 10

B.E — Computer Science
Visvesvaraya Technological University (VTU) | 2009

CERTIFICATIONS

- ITIL V3 Foundation
- AWS Solutions Architect – Associate
- VMware Certified Associate – Data Center Virtualization
- VMware Certified Associate – Cloud
- VMware 4.1 (IBM)
- German Language: A1 & A2

Project 3: Blockchain

- Architected and configured Hyperledger network setup on a DMZ zone using physical servers and AWS; provisioned NUCs and AWS with Chef/Ansible playbooks.
- Containerized microservices for Sawtooth configuration using Docker Compose; automated PXE server setup with code coverage test cases on DMZ.

Technologies: Chef, Ansible, Terraform, AWS, Rundeck, Docker, Jenkins

Project 4: Zephyr CI

- Managed Jenkins jobs via YAML using Jenkins Job Builder; administered Git and Gerrit workflows; scripted Python-based test case automation for the Zephyr CI team.

Technologies: Python, Shell scripting, YAML/JJB, Gerrit, GitHub, Jenkins, Docker

Senior DevOps Consultant

SAP Labs India Pvt. Ltd. | Bristlecone Pvt. Ltd. | *Dec 2015 – Nov 2016*

- Established CI/CD infrastructure and automation framework on data centers using Rundeck, Chef Server, Chef Workstation, GitLab, and Yum repo.
- Developed Chef cookbooks and ServerSpec code for application automation for products including SAP JAM and Community platforms.
- Delivered training sessions to SAP employees on Chef and DevOps methodologies.
- Set up CI engines (Jenkins) and deployment tooling (Rundeck) for cloud delivery; automated VM deployments on AWS.

Technologies: Chef, Ruby, Shell scripting, Rundeck, Jenkins, GitLab, AWS, VMware, SAP Monsoon Cloud

Senior System Administrator / DevOps Consultant

SAP Labs India Pvt. Ltd. | Computer Sciences Corporation | *Apr 2013 – Dec 2015*

- Developed solutions, policies, and processes for Configuration Management, CI/CD, and Build & Release Management in an automation functional team.
- Planned, executed, and documented automated application deployments in collaboration with software development teams.
- Built infrastructure automation tools for public and private cloud environments; automated SAP HANA DB and application installation using Chef cookbooks.

Technologies: Chef cookbooks, Ruby, Perl, SAP Monsoon Cloud, Jenkins, VMware, Linux, Windows

System Administrator

Datamatics Soft Services Ltd. | *Sep 2012 – Apr 2013*

- Administered JBoss Application Server and handled troubleshooting; managed job scheduling and automation using CRON and AT.
- Maintained VMware virtual environments and Apache web server administration.

System Administrator

Sloka Telecom Pvt. Ltd. | *Sep 2011 – Sep 2012*

- Independently maintained entire organization IT infrastructure including server management, network administration, and intranet web applications.
- Configured VPN, IP firewalls, network switches, patch management, and MySQL database management.

System Engineer

Synova Innovative Technologies Pvt. Ltd. | *Mar 2011 – Sep 2011*

- Built, installed, and tested Linux and Windows environments on VMware; configured and managed virtual infrastructure, VMware clusters, HA, DRS, and vMotion.

Production Support Engineer

Yalamanchili Software Exports | *Aug 2010 – Mar 2011*

- Managed Karnataka Bank ATM switch team operations; administered Oracle 9i databases including recovery, user management, space management, OLTP performance tuning, and ATM operations.
